# The Global Approach to Responding to the New Data Requirements related to the Swiss Case

Georges-Simon Ulrich, Swiss Federal Statistical Office

15<sup>th</sup> IAOS conference

7 December 2016, Abu Dhabi

# Global Action Plan for Sustainable Development Data

- ❖ Developed by the High-level Group for Partnership, Coordination and Capacity Building for the 2030 Agenda (HLG-PCCB);
- ❖ 6 Strategic Areas – 13 Objectives – 54 Key Actions;
- ❖ Global Consultation from 26 October to 13 November 2016;
- ❖ Presentation at the First UN World Data Forum in Cape Town (January 2017);
- ❖ Adoption at the 48<sup>th</sup> UN Statistical Commission in March 2017;
- ❖ Possible link to a new UN resolution describing the tasks of the UN Statistical Commission pertaining to the 2030 Agenda for Sustainable Development.

# «Architecture» of the Action Plan and the regional Road Maps

- ❖ Global level:
  - ❖ HLG-PCCB;
  - ❖ Action Plan for Statistics;
- ⇒ General.
  
- ❖ Regional Level:
  - ❖ For example UNECE Steering Group;
  - ❖ Road Map;
- ⇒ More detailed and respecting the regional circumstances.
  
- ❖ National Level:
  - ❖ National Statistical Offices;
  - ❖ Road Map or strategies;
- ⇒ Tailored for the national statistical system.

# Swiss case: Collaboration between the statisticians and the policy-makers is crucial

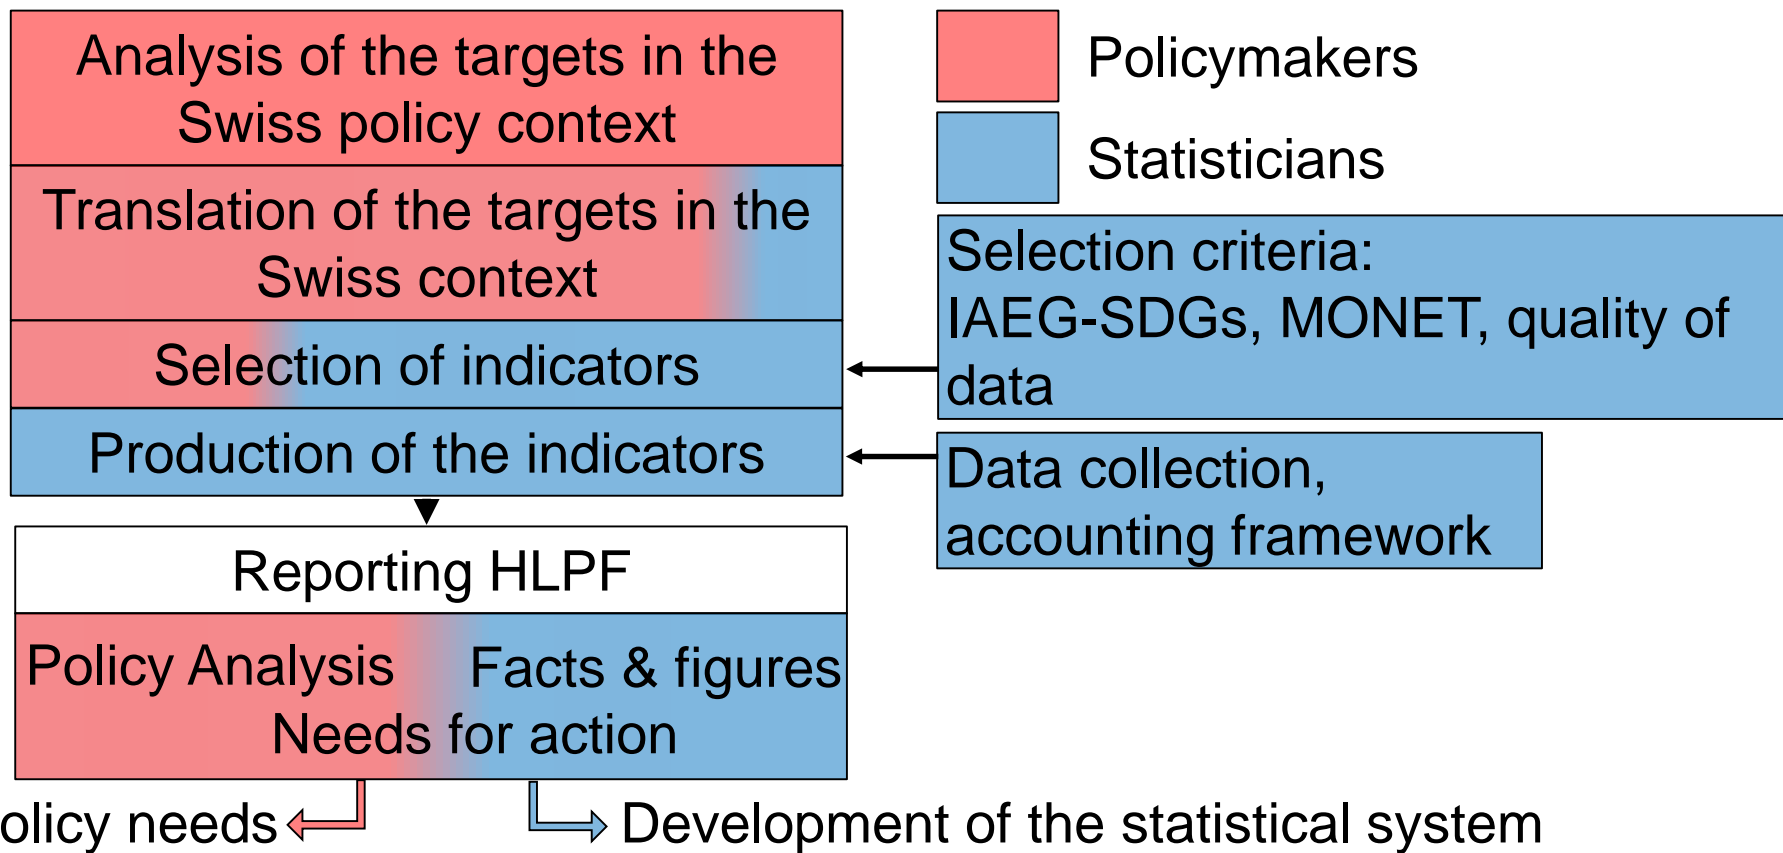

- ❖ Culture of dialogue, cooperation and co-construction;
- ❖ Pre-defined rules of the game;
- ❖ Clearly defined processes and well documented decisions;
- ❖ Respect of the specific role of each actor (in our case the independency and the neutrality of official statistics);
- ❖ Shared knowledge and skills;
- ❖ Large and robust statistical basis (surveys, data, accounting frameworks, methods).

→ the toolbox

# Implementation and monitoring of SDGs in Switzerland

# Summary

- ❖ The statistical community needs to have an «architecture» that links the global, the regional and the national levels (community building);
- ❖ NSOs can profite from the experiences made by other countries building up parternships with other data users;
- ❖ Switzerland has very good experiences with data producers (and users) within the administration;
- ❖ Still lacking experiences and tools to start partnerships with other data producers.
