Making Data Accessible: Building Trust with Users

It replaced a website that had been widely criticised by users. Including being called; “..a national embarrassment.” in the Financial Times.

Making Data Accessible: Building Trust with Users

**According to a Parliamentary Administration
Select Committee;**

**“The Office for National Statistics website
makes figures hard to find and statistics are
often presented in a confusing way..”**

Making Data Accessible: Building Trust with Users

To be widely respected for informing debate and improving decision making through high quality, easy to use statistics and analyses on the UK's economy and society.

Better Statistics. Better Decisions.

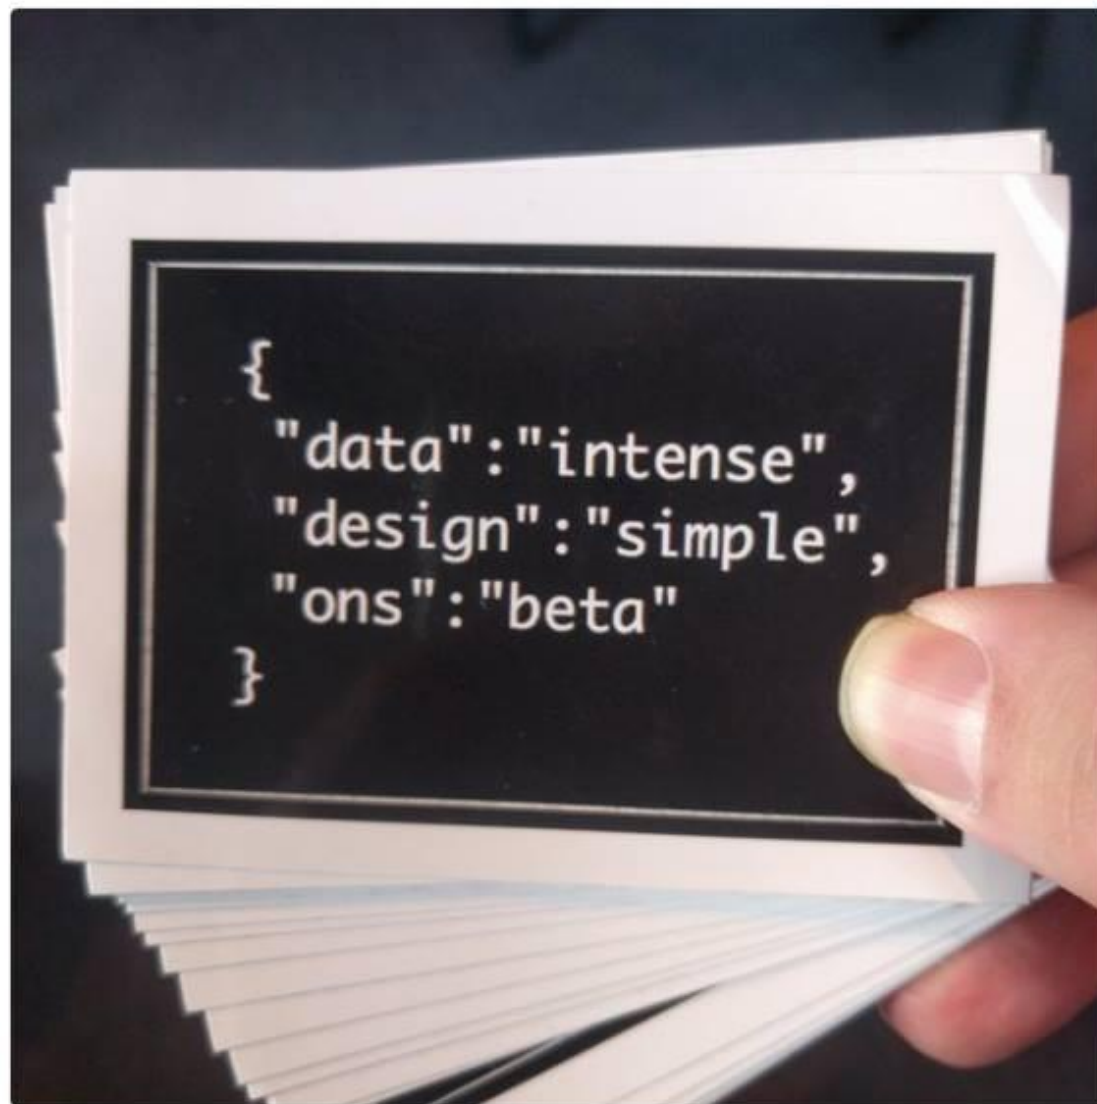

Making Data Accessible: Building Trust with Users

To be widely respected for **informing debate and improving decision making through high quality, easy to use statistics and analyses on the UK's economy and society.**
Better Statistics. Better Decisions.

Making Data Accessible: Building Trust with Users

Data intense. Design simple.

@lauradee

Making Data Accessible: Building Trust with Users

Of the web, not on the web.

Stephen Dunn (while at the Guardian).

@lauradee

Making Data Accessible: Building Trust with Users

**Make things open: it
makes things better**

Making Data Accessible: Building Trust with Users

Always put our users first

We always start with our users. We ask, observe, analyse and act based on their needs. We don't make assumptions. We have empathy for our users.

@lauradee

Making Data Accessible: Building Trust with Users

**Almost 2000 individuals &
80 organisations**

**contributed to our user research or provided
feedback on the website as it evolved in the open.**

@lauradee

Making Data Accessible: Building Trust with Users

More than 300 people

contributed to the research for the new navigation structure alone.

@lauradee

Making Data Accessible: Building Trust with Users

**Three personas:
expert analyst, information
forager & inquiring citizen.**

**used to improve research recruitment never in place of
observed insights.**

Making Data Accessible: Building Trust with Users

ons.gov.uk focuses on information foragers & expert analysts.

but to ensure that 'inquiring citizens' were catered for we launched Visual.ONS as an experiment - it features new formats and more topical content.

Making Data Accessible: Building Trust with Users

Public beta

we provided public access to the Beta of the site as it was developed for six months.

Making Data Accessible: Building Trust with Users

Guerilla testing.

**visited universities and statistical
conferences seeking feedback.**

@lauradee

Making Data Accessible: Building Trust with Users

Critical friends.

group of [very] expert users who were regularly consulted.

Making Data Accessible: Building Trust with Users

Surveys.

user satisfaction survey to provide a benchmark and a terminology survey to investigate use of language.

Making Data Accessible: Building Trust with Users

Online tools.

especially Loop11 and Chalkmark for quick tests to investigate hypotheses suggested by wider user research.

Making Data Accessible: Building Trust with Users

Ethnographic research.

visiting users to observe them using the website in their workplaces rather than in artificial circumstances.

Making Data Accessible: Building Trust with Users

Diary studies.

**asking a cohort of users to maintain a diary of their experiences of using the website.
When/why/where and sentiment at time of use.**

Making Data Accessible: Building Trust with Users

A/B testing.

making use of tools like Google Experiments & Optimizely to show users different versions of same page to see which worked best.

Making Data Accessible: Building Trust with Users

- 1. Background**
- 2. Vision & ambitions**
- 3. User research & engagement**
- 4. Lessons learned**
- 5. Questions**

Making Data Accessible: Building Trust with Users

Being open is not enough.

despite the public Beta, regular blogging, all the user research, liberal use of social media & talks all around the UK most users were taken by surprise by the new site.

Making Data Accessible: Building Trust with Users

Users want to help.

we spoke to users all over the UK and they were always generous with their time and their knowledge.

@lauradee

Making Data Accessible: Building Trust with Users

You cannot please everybody.

despite all our user research and engagement some users will feel let down because we did fix the issues that frustrate them most.

Making Data Accessible: Building Trust with Users

People dislike change.

even users who hugely disliked the previous website found the move to the new one jarring. 'Big bang' launches are challenging.

Making Data Accessible: Building Trust with Users

**Launching is the start not
the finish.**

**we received more feedback in the first two
weeks of the launch than in the previous six
months.**

@lauradee

Making Data Accessible: Building Trust with Users

Internal users are important.

we could have started our internal engagement activities earlier and provided more resource to them.

@lauradee

Making Data Accessible: Building Trust with Users

Make your roadmap public.

it is vital to make sure users understand that there is a commitment to continuous improvement and a public roadmap makes a statement.

Making Data Accessible: Building Trust with Users

Working this way is hard but extremely rewarding.

spending this much time with this many users increases empathy with their challenges and they with yours.

@lauradee
